

ENERGY STORAGE

Energy science boosts American manufacturing and creates jobs.

New cathode battery material stores more energy and is the cheapest, safest, and longest-lasting available.

New material licensed to GM, Envia, BASF, LG Chem and Toda Kogyo. New American manufacturing and production facilities being built by GM, LG Chem, BASF, and Toda – with hundreds of jobs being created.

Advanced battery materials will

- ▶ Help make hybrid and electric vehicles more affordable
- ▶ Boost American manufacturing and create jobs — cars assembled in the U.S. need battery manufacturers nearby
- ▶ Help transform our transportation industry
- ▶ Help keep the U.S. economically competitive for years to come
- ▶ Reduce our dependence on foreign energy

Chevrolet Volt
battery contains
Argonne-developed
cathode material.
